

25 Days

Fast Track Masterclass Batch
Become Placement Ready!

Study Plan can be used by:

- **Pre final year students**
- **Final Year students**
- Students preparing for **Service based Companies**
- Students preparing for **Product based Companies**

Ajinkya Sir's guidelines about "How to use this study plan"

Below mentioned Placement preparation schedule is conducted through live sessions and self paced sessions.

We will have 5 hours of live sessions every day for next 25 days. Since placement season is near and less time available for placement preparation, students should put more efforts for placement exams.

If you miss any live session, you can watch recordings later.

You can choose any programming language to continue your preparation. But if you are confused how to prepare, just follow the given schedule. You can enroll for Talent Battle Masterclass to follow the given schedule.

Please follow this time table sincerely.

In case you have exam or any other urgent work, you can take break and continue with next possible date. Some topics are optional, you can choose to skip it.

This schedule is to help you to get best results in organized way, however you can make changes to this schedule according to your requirement.

You can start company specific training once you finish foundation training.

We have considered most important topics for this particular schedule. You can do remaining topics as well as per your convenience.

Ajinkya Kulkarni
Co-founder, Talent Battle

Overview of Complete Placement Preparation Masterclass

Content Type	Detailed information	
Aptitude Training	All important topics of Quantitative, logical reasoning & verbal ability are covered from basics with additional practice questions.	
Coding Training	C, CPP, Java , Python programming languages are covered from basics to advanced level.	
DSA Training	Data Structure & Algorithms are covered from basics in all 4 languages.	
Company Specific Training	20+ companies specific training with previous year questions covered	You can learn this anytime as per your convenience
Full Stack Development	300+ hours of detailed course with Placement guarantee, videos, projects, tasks and assignments	You can learn this anytime as per your convenience
Data Science, AI , ML	Detailed course with videos, projects, tasks and assignments	You can learn this anytime as per your convenience

Content Type	Detailed information	
Projects	25+ Projects on programming languages, full Stack Development, Data science, AI , ML, IoT, AWS, Robotics, Django, Tkinter, MongoDB and others	You can do these projects anytime as per your convenience
Technical Interview Preparation	Live session will be conducted for guidance	
Personal Interview Preparation	Live session will be conducted for guidance	
Resume Verification	Live session will be conducted for guidance	
Mock Technical Interview	Practice 1 to1 interview with experts	Anytime as per your requirement
Mock Personal Interview	Practice 1 to1 interview with experts	Anytime as per your requirement
Mock Tests	300+ Mock tests	Anytime as per your requirement
DBMS Preparation	Detailed course is ready	You can learn this anytime as per your convenience
Computer Networks Preparation	Detailed course is ready	You can learn this anytime as per your convenience
Operating Systems Preparation	Detailed course is ready	You can learn this anytime as per your convenience

Fast Track Batch - Masterclass Schedule

Day Number	Mandatory things to cover	
	Session Type	Session Name
Day 1	General Aptitude	Percentage
	Coding	Intro, Var, Const, Literals, Datatypes
Day 2	General Aptitude	Profit Loss,
	Coding	Operators, Flow Control
Day 3	General Aptitude	HCF LCM, Number system, Divisibility rules and remainder theorem, log
	Coding	Functions, Arrays
Day 4	General Aptitude	Ratio and proportion
	Coding	Strings, Pointers
Day 5	General Aptitude	Ages, Partnership
	Coding	Structures, OOP Part 1
Day 6	General Aptitude	Syllogisms, Averages
	General Aptitude	Time and work, Pipe Cisterns

Day Number	Mandatory things to cover	
	Session Type	Session Name
Day 7	General Aptitude	Train, Time Speed Distance
	Coding	OOP Part 2
Day 8	General Aptitude	Error detection and sentence correction, one word substitute, synonym antonym
	Coding	Exception Handling, STL
Day 9	General Aptitude	Coding decoding, Data interpretation
	DSA	DSA Intro, Array
Day 10	General Aptitude	Calender and clock
	DSA	Stack, Queue Part 1
Day 11	General Aptitude	Area and volume, mensuration
	DSA	Queue Part 2
Day 12	General Aptitude	Fill in the blanks, Cloze test
	DSA	Linked List

Day Number	Mandatory things to cover	
	Session Type	Session Name
Day 13	General Aptitude	Letter, number series, Odd man out, Games and puzzles
	General Aptitude	Blood Relation, Sentence improvement,
Day 14	General Aptitude	Power, surds, and indices, simplification
	DSA	Hashing, Tree part 1
Day 15	General Aptitude	Data sufficiency, Alligation Mixture
	DSA	Tree part 2
Day 16	General Aptitude	Permutation Combination
	DSA	Graph, Recursion
Day 17	General Aptitude	Probability
	DSA	Sorting Algo Part 1
Day 18	General Aptitude	Trigonometry, height and distance
	DSA	Sorting Algo Part 2

Day Number	Mandatory things to cover	
	Session Type	Session Name
Day 19	General Aptitude	Course of action, Statement argument, Statement assumption, weaken strengthen argument
	DSA	Searching Algo
Day 20	DSA	Greedy Algo Part 1
	DSA	Greedy Algo Part 2
Day 21	General Aptitude	Geometry
	DSA	Dynamic Algo Part 1
Day 22	General Aptitude	Parajumble, RC
	DSA	Dynamic Algo Part 2
Day 23	General Aptitude	Aptitude Revision
	DSA	Dynamic Algo Part 3
Day 24	Resume Session & Verification	
Day 25	Personal & Technical Interview Guidance Session	

After 25 Days, you can continue with company specific training / projects / latest technologies training as per your requirement.

Note: Once you finish 25 days of the study plan, you will have different options to follow to strengthen your profile.

a) You can either continue with company-specific training as per your college campus or off-campus opportunities.

b) You can develop any projects out of 25+ projects available on the Talent Battle dashboard based on programming languages or the latest technologies.

c) You can learn any latest technologies training such as Full Stack Development, Data Science, AI, ML, IoT, Robotics, and AWS as per your requirement.

List of **aptitude topics** you will study during **Masterclass training**:

Quantitative Aptitude - Modules

- Percentage
- Profit Loss
- SI CI
- Alligation Mixture
- Area and volume, mensuration
- Arithmetic aptitude and word problems
- Averages
- Calender
- Clocks
- Data interpretation
- Remainder and power cycle theorem, log
- Geometry
- HCF LCM, Factors and multiples
- Number system and Divisibility rules
- Permutation and combination
- Probability
- Time and work
- Pipes and cisterns
- Power, surds, and indices, simplification
- Ages, Partnership
- Time Speed distance
- Trains
- Boats and races
- Ratio and proportion
- Linear Equations
- Trigonometry, height and distance
- Ap, Gp and Hp

List of **aptitude topics** you will study during **Masterclass training:**

Logical Reasoning - Modules

- Blood relation
- Coding decoding
- Direction sense
- Attention to details
- Data sufficiency
- Games and puzzles
- Inequality
- Input output
- Letter, number series, Odd man out , analogy
- Visual reasoning / non verbal reasoning
- Seating and Data arrangement
- Open cubes and dice , paper cuts and holds
- Syllogisms

Verbal Ability - Modules

- Voices - Active & Passive Speeches
- Direct & Indirect
- Fill in the blanks & Cloze test
- Sentence Improvement
- Error detection & Sentence correction
- Para jumble
- Reading
- Comprehension
- Articles
- Prepositions
- Verbal analogies
- Synonyms & Antonyms
- One word substitutes
- Sentence formation
- Idioms & Phrases

List of certified Latest technology trainings covered in complete masterclass

Data Science	Machine Learning
Full Stack Development	Artificial Intelligence
Bootstrap	Data Analytics
JavaScript (Advanced JavaScript, JavaScript OOP, JavaScript DSA, J Query)	Internet of Things
MongoDB	AWS Cloud Computing
Angular JS	dJango
Node JS	Tkinter
React JS	Robotics
HTML	CSS

Importance of learning the latest technologies & completing projects that are provided in masterclass training

Companies that provide the above 6 LPA packages, expect candidates to know the latest technologies like Full Stack Development, Data Science, AI, ML etc.

If you take the example of TCS Digital, Cognizant GEN C Next which provided more than 7 LPA, during their interview rounds, interviewers ask candidates questions regarding knowledge of the latest technologies.

You should complete some projects as well based on these technologies. In Talent Battle masterclass, you get 15+ latest technologies certification courses with projects.

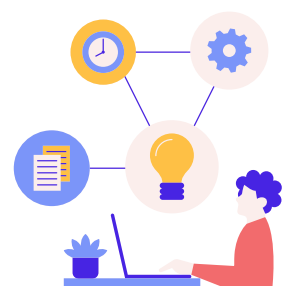

Talent Battle Complete Masterclass provides you detailed self-paced Full Stack Development course with a placement guarantee along with tasks, projects, assignments.

Around 80% of the students do only academic projects. To target high LPA companies, you need to create additional hobby projects that you can showcase during your interviews. The project level can be mini to mega.

You need to have a minimum of 5 projects based. on different programming languages.

In Talent Battle Complete Masterclass, You get 25+ projects based on programming languages, and the latest technologies. You can complete these projects and get certifications for the same.

List of company specific trainings covered in Masterclass:

TCS Ninja(NQT)	L&T Infotech	HCL
TCS Digital	DXC Technology	Hexaware
Wipro	Tech-Mahindra	Josh Technologies
InfyTQ	Deloitte	Mphasis
Infosys	Virtusa	Adobe
Accenture	Persistent	Zoho
Cognizant	IBM	Amazon
Capgemini	Mindtree	Cisco
Mu Sigma	Bosch	HP

Why Company Specific Training is important?

- Suppose you come to know that TCS/ Cognizant or any XYZ company is going to have their campus drive. Then you need to start with **company-specific training** for that particular opportunity.
- You need to understand, you can not directly jump to company-specific training. You must complete **foundation training** before going for company specific stage
- You need to solve the **previous year's questions** about that particular company. You need to check the syllabus, and exam pattern for that particular company and accordingly prepare for that opportunity. We have covered 27+ companies specific training in complete masterclass.

- You need to realize that all companies will not ask questions based on all aptitude topics or all technical subjects.
- Once you go through the pattern, you can identify important topics and you can just focus on them. For example, last time Capgemini didn't ask questions on quant
- Questions were asked on verbal, pseudo-code, and game-based aptitude. It means, for Capgemini preparation, you can skip quant and logical topics from revision. Whereas TCS will ask you questions on quant, logical, verbal and coding statements, so you need to prepare all sections.
- That is why company-specific training from a complete masterclass will help you to save your time and effort to prepare in a better way.

Some common points to note:

a) You must face at least **1 mock technical and 1 mock personal interview** before your actual interview rounds. You can practice mock interviews in the complete masterclass.

b) You should also take **company-specific mock tests available in the complete masterclass** to improve your time management and to check if you can implement whatever you have learned during mock tests.

c) You must go through website of company. You must have information about the **leadership team, products , services, customers of the company**. You can easily find this information on Google.

d) You can do some minor changes to your resume based on the company's profile. Talent Battle experts verify the resumes of masterclass students and provide them with necessary corrections.

Some common questions of students

Q: From where can I do preparation for all placement related topics?

I don't have any basic knowledge about aptitude and coding, can I actually get good job offer ??

A:

- Talent Battle Complete **Masterclass** can help you to prepare for all **sections** and achieve your **first job**. You don't need to worry even if you have zero knowledge about aptitude and coding.
- Our **structured master class** training program ensures students to become ready for any placement opportunity. We provide **live as well as self-paced sessions** to our students. We have special doubt-solving community where students can ask their questions to our experts.
- **You can connect with our mentor to get more details:**

97.6% Placement Success Rate for Talent Battle Students! – Primex News Network

By PNN
JAN 28, 2023

WEATHER

Activate Windows
Go to Settings to activate Windows.

New Delhi(India), January 28: Ed-tech platform [Talent Battle](#), which is the one-stop platform for placement preparation and upskilling, has achieved a 97.6% selection ratio for its subscribers in the year 2022. Talent Battle's complete placement preparation masterclass and its referral network in MNCs and start-ups have helped Talent Battle place 97.6% of its students in 2022.

Talent Battle provides a complete placement preparation masterclass for students preparing for aptitude, coding, and wanting to learn the latest technologies like artificial intelligence, machine learning, data science, and full-stack development. It is basically a concept of "one course" that has it all. Students need not go and purchase individual courses from different platforms; instead, a single subscription to Talent Battle gives them access to all the courses and skills required for placement preparation and upskilling.
